

MARK WILLIAM PAJARILLO

Bachelor in Information Technology
Poblacion Sur, Maddela, Quirino 3404 | hed-mwpajarillo@smu.edu.ph | +63 939 737 4249 | <https://liamm-dev.vercel.app>

PERSONAL SUMMARY

Motivated Information Technology graduate with experience in full-stack web and mobile development, UI/UX design, and data-driven systems. Building scalable applications and solving real-world problems through technology. Seeking an opportunity to contribute technical expertise while continuing to grow as a software developer.

EDUCATION

Saint Mary's University, <i>B.S in Information Technology</i> - Dean's Lister (1st Year, 1st Sem & 4th Year, 2nd Sem) - Bronze Merit (2nd Year, 1st Sem & 3rd Year, 1st Sem)	2022 – 2026 <i>Bayombong, Nueva Vizcaya</i>
Saint Vincent School <i>Senior High School</i> Graduated with Distinction	2020-2022

LEADERSHIP & ACTIVITIES

Student Council, SEAIT <i>Public Relation Officer</i> Managed official communications and created digital materials for student events and announcements	2023–2025
Quirinian Student Organization <i>Auditor</i> - Reviewed financial records and ensured transparency in organizational budgeting and reporting - Assisted in implementing outreach programs and organized documents	2025 – 2026

Technical Skills

Skills: React.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS; Node.js, REST APIs; MongoDB; Git, Figma

EXPERIENCE

ATSOCA Learning and Consultancy OPC <i>IT Intern/Research Assistant</i> - Developed a Form Analysis System to process, analyze, and extract actionable insights from Google Forms responses, supporting data-driven decision-making for training program development. - Designed and developed a Competitor Analysis System with automated web scraping workflows using SerpApi and custom extraction logic to collect competitor training data, pricing, schedules, and event details. - Conducted market and industry research to identify emerging training opportunities, competitor offerings, and gaps in the learning and development market.	February 2026 – May 2026
--	---------------------------------

PROJECTS

MediSync: A Medical Information System for SGOD <i>Frontend Developer</i> - Built a responsive frontend dashboard for a medical information system used by SGOD to manage and visualize student health data - Improved system usability through intuitive navigation, advanced filtering, and interactive data visualizations, enabling faster access to critical health information.	2025 - 2026
FormInsight - Intelligent Survey Analytics System <i>Full-Stack Developer</i> - Developed a Decision Support System that transformed survey responses into actionable insights, enabling stakeholders to identify training needs and make data-driven program decisions. - Automated data processing and trend analysis, significantly reducing manual effort while improving the accuracy and speed of training needs assessment. - Integrated AI-powered recommendations and built a full-stack platform (React, REST APIs) that delivered real-time	2026

analytics, helping decision-makers prioritize high-impact training initiatives.

Competitor Analysis System

2026

Full-Stack Developer

- Developed a Competitor Analysis System that centralized competitor training, seminar, pricing, and event data, providing stakeholders with a single platform for market intelligence.
- Built an automated data collection pipeline that gathers competitor information, reducing manual research time and improving data accuracy.
- Crafted analytics modules for monitoring trends, ensuring timely business decisions.

Attendr - OJT Attendance Monitoring System

2026

Full-Stack Developer

- Developed a geo-fenced attendance system using QR codes and GPS validation
- Built a mobile-first web app with React and TypeScript for seamless QR scanning
- Implemented REST APIs for user management and attendance tracking, enhancing data accuracy.

Hydration Tracker

2026

Full-Stack Developer

- Built a cross-platform mobile app using React Native (Expo) and TypeScript
- Designed and implemented a context-aware hydration recommendation engine by integrating device sensor data and weather APIs, delivering personalized hydration insights based on environmental and user conditions.

Study Buddy

2025

Full-Stack Developer

- Designed and developed an AI-driven study application featuring document-based note generation, automated quiz creation, and personalized learning insights to enhance study efficiency.

Workshops & Seminars: Cybersecurity Conference, GitHub Seminar, Fiber Optics Seminar, Real-Time Web App Development, Advanced MS Excel Course, Cyber Resilience: From Breach to Recovery
