Summary

Full-Stack Developer specializing in React, TypeScript, and data-driven systems. Experienced in building analytics platforms, decision support systems, and scalable web applications with a focus on usability, performance, and real-world impact

Technical Skills

Frontend: React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Backend: Node.js, Express, REST APIs

Databases: MongoDB, MySQL

Tools: Git, GitHub, Figma, Google Workspace

Other: UI/UX Design, Responsive Design, API Integration

Experience

IT Intern/Research Assistant

Atsoca Learning and Consultation OPC | February 2026 - May 2026

- Developed a **form analysis system** to process and extract insights from Google Forms responses, supporting data-driven decision making for training program development.
 - Performed market and industry research on potential training and seminars to expand the company's learning program offerings.
 - Assisted in analyzing respondent feedback to recommend relevant and high-impact training solutions.
-

Projects

MediSync: A Medical Information System for SGOD | Frontend Developer | 2025 - 2026

- Built a responsive frontend dashboard for a medical information system used by SGOD to manage and visualize student health data
- Enhanced user experience by implementing intuitive navigation, data filtering, and dynamic visualizations for efficient health data management

FormInsight - Intelligent Survey Analytics System | Full-Stack Developer | 2026

- Developing a decision support system to analyze survey data and identify training needs
- Implemented data processing pipelines to extract trends, metrics, and user insights
- Integrated AI-driven recommendations to align training programs with user feedback
- Built a full-stack platform with React frontend and REST APIs for real-time analytics

Attendr - OJT Attendance Monitoring System | Full-Stack Developer | 2026

- Developed a geo-fenced attendance system using QR codes and GPS validation
- Built a mobile-first web app with React and TypeScript for seamless QR scanning
- Implemented Rest APIs for attendance tracking and user management
- Designed a real-time dashboard using WebSockets for live monitoring
- Automated hour tracking and report generation, improving accuracy and efficiency

Hydration Tracker | Full-Stack Developer | 2026

- Built a cross-platform mobile app using React Native (Expo) and TypeScript
 - Designed a context-aware hydration algorithm integrating sensor data (steps via Expo Pedometer), weather APIs, and beverage impact modeling
 - Implemented local storage and background tasks for tracking user activity
 - Developed notification-based reminders based on user behavior and thresholds
-

Education

Saint Mary's University, Bayombong, Nueva Vizcaya

B.S. in Information Technology | 2022 – Present

- **Thesis:** *MediSync: Medical Information System for SGOD – School Health Section A Decision Support System*

- Dean's Lister (1st Year, 1st Sem)
- Bronze Merit (2nd Year, 1st Sem & 3rd Year, 2nd Sem)

Saint Vincent School Inc., Maddela, Quirino

ABM – Senior High School | 2020 – 2022

- Graduated with Distinction
-

Leadership & Activities

Student Council, SEAIT

Public Information Officer | 2023–2025

- Managed official communications and created digital materials for student events and announcements

Quirinian Student Organization

Auditor | 2025 – Present

- Reviewed financial records and ensured transparency in organizational budgeting and reporting
-

Additional

Workshops & Seminars: Cybersecurity Conference, GitHub Seminar, Fiber Optics Seminar, Real-Time Web App Development

Interests: UI/UX Design, Web Development, Software Engineering, Team Collaboration
